## Print to Canvas

These are canvas prints which are a combination of first-rate canvas fabric and an HP latex ink rendition of your selected photo, stretched over a hand-crafted wooden frame. Simply choose a size and the thickness of your canvas print from the price list and add a compelling edge finish.

- Customisable with individualised edge designs.
- Hand-stretched canvas over a quality wooden frame.
- Vivid hues and excellent image sharpness.
- Special latex inks with UV protection.
- Certified canvas made specially for printing.

Choose your 2cm frame or 4cm frame, then choose your finished edge

### Folded Edge

Just like with classic art canvas, your photo print on canvas is stretched to fit the frame perfectly. This option may not be suitable if the image is tightly cropped and essential elements of the photo are located too close to the edges, especially on 4cm frames.

### Stretched Edge

For this type of canvas print, the outermost pixels of your photo are stretched in length and applied all around the outer edge of the frame. Your image is visible in its entirety on the front side of the canvas.

### Mirrored Edge

Your image can be seen in its full glory on the front side of the canvas print. The outer edge of your photo is then copied, inverted, and added to the frame after the main print is already completed.

### Black Edge

Your image is printed only on the front of the canvas while a black edge is applied to the sides of the photo canvas print. The black outer frame complements most environments and adds a contrast.

## Print to Canvas with a Premium Floating Frame

The characteristic folded edges of the canvas are visible through the decorative floating frame, which makes the floating frame a very popular framing style in galleries.

Create your own photo on canvas and choose a suitable floating frame from any of the following colour finishes:

## Framed Photo

### Sharp photo print in high-quality

Discover details you've never seen before. Your photo is digitally printed in razor-sharp resolution and brilliant colours, resulting in a print of stunning quality.

### Mounts with oblique finishing

Each mount is made out of high-quality white museum card stock. The oblique cut of each mount gives your photo depth and draws the viewer's eye to it.

### Personalised decorative frames

Printed, framed, delivered – your gallery framed photo comes completely framed so you can hang it up from the moment you unbox it. Each frame is made by hand and finished with a crystal-clear acrylic pane.

Your gallery framed photo comes with a high quality solid frame. Select a colour that best suits your photo or lends a touch of contrast. Choose the perfect frame from the selection of options from striking colours to warm wood tones.

## Acrylic Photo Prints

High resolution crystal clear acrylic prints

Acrylic prints fit beautifully in any room with it's clean contemporary lines.

Printing to acrylic creates a sharp image in bright colours. This look is achieved through a professional 12 colour printing process that allows the finest colour differences and the best resolutions to shine through. Your digital photo print is carefully laminated on to 3mm thick crystal clear acrylic which is manufactured to a flawless finish. The edges are carefully polished ensure the best results for your photo print.

An invisible picture hanging kit is supplied with this photo print.

This is premium product and is worth noting that acrylic can warp for larger sizes. Therefore, if choosing larger sizes it is recommended upgrading the back to forex or aluminium to increase its stability.

## Aluminium Photo Prints

High image sharpness on photo paper with aluminium prints

Your photo on aluminium will shine thanks to state-of-the-art printing technology and first-class colour printing in brilliant colours. New and improved lab-quality photo paper shows your image in the highest sharpness and with the best resolution possible.

Your photo is laminated on to high-quality photo paper and then on to a precisely cut aluminium composite panel. Your aluminium print will be finished with a glossy protective film. The gloss effect and the colour depth are unique to this process. A protective foil then protects your aluminium photo print in rooms with high humidity such as a kitchen or bathroom.

The core of the back is made of a plastic that makes your image both lightweight and stable at the same time. The black plastic core is enclosed between two fine sheets of aluminium.

As with the acrylic prints, these aluminium prints will be provided with an invisible picture hanging kit.
